A World Of Information Innovation PROVIDING A WORLD OF TECHNOLOGY SOLUTIONS

ISCI

INFORMATION TECHNOLOGY
QUALITY ASSURANCE • SECURITY & INTELLIGENCE
MARITIME SECURITY • TRAINING

ENSURING THE SUCCESS OF THOSE WE SERVE IN A DIGITAL AGE

In today's digital age it is essential to not only understand, but to master each of the technologies that allow our enterprises to function and exist. ISCI specializes in analyzing the business needs of organizations and then empowering them with the resources necessary to make effective business decisions that increase the efficiency and productivity of operations. We enable each business unit to shape and use next generation technology to fit its specific needs and functions. From interdepartmental workflow, complex process and data management, document management and strategy, messaging and electronic commerce, to work planning and course development, our consulting team works with each client to develop a customized IT solution that will best suit their needs.

INFORMATION TECHNOLOGY

Information Technology

ISCI provides a full range of IT Support Services as a prime or subcontractor. Within our core capabilities the ISCI team provides a full range of Information Systems Integration including planning, research and development, coordination, implementation and technical support for the effective operation, maintenance and support of existing legacy, client server, and web based systems, solution, services, and user support.

Information Assurance

Our Information Technology Assurance team has detailed knowledge of business operations and the technologies used to ensure the confidentiality, integrity, authentication, availability, and non-repudiation of organizational data. At ISCI our risk management professionals have experience with various operational roles on a wide array of software platforms and applications. ISCI ensures our solutions are customized to specific needs to guarantee exceptional performance, saving clients time and money.

Core Competencies

- Program Management Support
- Software Development & Testing
- Information Security
- Legacy System Integration & Support Operations
- Program Management
- Information Assurance

QUALITY ASSURANCE

Monitoring, Testing, Independent Verification and Validation (IV & V)

ISCI provides Quality Assurance oversight through our implementation of a web-based SAP Strategy Management System. The system once implemented, gives insight into the performance of various IT projects. Our unique capability allows Contractor performance to be viewed by government project managers and department managers right from their desktop via web interface and enables real time monitoring of work performance.

ISCI's Quality Management System (QMS) allows the ISCI Team to configure data feeds directly from a software system such as Remedy or from an on-line SQL or Oracle database. With this raw data, we can tailor reports that are displayed via a dashboard on the manager's desktop. The information displayed allows the manager to modify their view of the world to satisfy specific areas of responsibility or interest. With an overview of the entire system, a manager can drill down into information as necessary to verify problem areas before they become major issues.

Core Competencies

- Software Systems Monitoring
 - Quality Engineering Oversight
 - IT Systems Analysis
 - Software Verification & Validation
 - Quality Surveillance Testing
 - Cost and/or Schedule Monitoring
 - Variance Analysis & Reporting
- 

SECURITY & INTELLIGENCE

Securing Systems With NextGen Technologies

The ISCI team of professionals provides the necessary services and products required to synchronize and integrate existing and emergent biometrics technologies. We have the capabilities held by our experienced staff to provide enterprise-wide information security, intelligence monitoring, network intrusion and detection, and full spectrum access control and monitoring.

ISCI provides a full array of Security Information Assurance (IA) support services from documenting to assurance. We support the implementation of a complete Information Assurance Vulnerability Management (IAVM) system to assure compliance with all directives.

Core Competencies

- Software Systems Security Monitoring
 - Facilities Security
 - IT Infrastructure Security
 - Intrusion Detection
 - Intrusion Vulnerability Assessments
 - Data Intelligence Monitoring & Collection
 - Systems Physical Security
 - Visual Information & Security Monitoring
- 

MARITIME LAW ENFORCEMENT

Maritime Security

As Global conflicts continue to grow and threaten our borders, it is essential to clearly understand all aspects of Global Maritime Law Enforcement. ISCI offers an effective Global Maritime Law Enforcement strategy program that deals with both Security Operations Planning and Support Management. As an industry leader, ISCI provides Exercise Development, Execution Support, and Consulting to assist maritime organizations in successfully implementing security programs.

Maritime Training

With the continued illegal use of new technologies and a variety of compact weapons by criminals and pirates on the high seas, it is imperative to be well trained and prepared. ISCI offers training programs for Maritime Law Enforcement in all areas of competency for international and domestic clients.

Core Competencies

- Maritime Law Enforcement Security & Training
(Counter Narcotics, Migration, and Terrorism, Piracy)
 - Port Security Operations
 - Operations Center Strategic Planning & Management
 - Operations & Incident Command System (ICS) Consulting
 - Maritime Operations Training *(IT, Law Enforcement, Small Boat Handling, and R.O.E.)*
 - Exercise Development, Execution, and Consulting
- 

TRAINING

A Complete Training Experience

ISCI offers traditional classroom, modified field, and nex-gen web based training using new and updated training documentation. Our expertise includes identification and recommendations of training elements that can be improved through employment of Interactive Multimedia Instruction (IMI) and Computer Based Training (CBT) techniques. We analyze requirements, develop training material, write the Program of Instruction (POI) and conduct training in the classroom, in the unit prior to deployment, and in the field using our highly qualified Field Service Representatives.

Our training capabilities include developing and conducting training on software systems, hardware systems, technical equipment, and major fielded systems to support the warfighter in theater. Our personnel have experience improving training efforts and overcoming some of the problems experienced in achieving and maintaining operator, administrator, and maintainer proficiencies in such a fast paced system and field environment.

Core Competencies

- Program of Instruction Development & Implementation
 - Training Program Execution
 - Field Training Support
 - Training Documentation & Delivery
 - IT System Training Development
 - Web Training System Support Services
