

A World Of Information Innovation

# ISCI

## INFORMATION TECHNOLOGY

ISCI offers a variety of customized next generation information technology and assurance program management tools which allow clients to access and manage synchronized real-time data, while conducting business across than entire organization within a completely secure environment.

### Information Technology

The ISCI Team provides a full range of IT Support Services as a prime or subcontractor to our government clients. Within our core capabilities we have experienced and knowledgeable team professionals in key technology areas of Information Systems Integrations including planning, research, development, coordination, implementation and technical support for nextgen technology solutions and deliverables. ISCI also offers effective operation maintenance and support of existing legacy systems, client server and web-based systems, solution, services, and user support.

### Information Assurance

Our Information Technology Assurance team understands business operations and the technologies used to ensure the confidentiality, integrity, authentication, availability, and non-repudiation of organizational data. ISCI solutions are designed for specific needs to guarantee exceptional performance, saving clients both time and money. Our business focus allows us to select the latest technology to enhance each client's business process and streamline their business decisions. ISCI continuously searches for innovative technology

solutions that can positively impact the operating environment and deliver repeatable value to our customers.
