

A World Of Information Innovation

SECURITY & INTELLIGENCE

ISCI provides a full range of reliable intelligence operations support services. ISCI offers Federal, DoD, and state agency clients comprehensive solutions that meet and exceed their system's technical, security, and strategic requirements.

In today's digital age, implementing nextgen technologies is essential in safeguarding and securing the authenticity, integrity, and non-repudiation of ever changing information. ISCI understands that an organization's ability to provide information security across its system is paramount to its long-term stability and ultimate success.

ISCI offers a full range of IT Security and Intelligence services. Our team provides the necessary products and services required to synchronize and integrate existing and emergent biometrics technologies throughout the DoD. We have the capability, experienced staff, and qualified partners to provide enterprise wide information security, intelligence monitoring, network intrusion and detection, and full spectrum access control and monitoring.

Within this broad area of information technology, ISCI also provides a full array of Information Assurance (IA) support services to include reviewing and analyzing processes, developing written procedures, conducting network intrusion inspections, and documenting IA assessments. ISCI can implement a full range of nextgen capabilities to

support implementation of a complete Information Assurance Vulnerability Management system to assure compliance with all DoD directives.

Core Competencies

- Software Systems Security Monitoring
- Facilities Security
- IT Infrastructure Security
- Intrusion Detection
- Intrusion Vulnerability Assessments
- Data Intelligence Monitoring & Collection
- Systems Physical Security

ISCI system security measures provide network intrusion prevention, malicious threat protection and data integrity assurance, spanning the full network infrastructure and operating environment.
