

A World Of Information Innovation

TRAINING ISCI

Using state of the art tools and highly knowledgeable industry experts, ISCI is able to offer effective customized programs and assessment tools which are designed to establish and enhance specific program goals.

Establishing a highly effective training program is essential in building strong, knowledgeable, confident leaders.

Training Program

ISCI develops classroom, web-based, and field training tools using updated techniques that allow each individual to enhance their capabilities. We analyze requirements, develop material, write the program of instruction, and conduct training in classrooms and in the field using field service representatives.

Leadership Program

Through strategic partnerships with Retired Military Officers and Academics, ISCI offers two levels of Leadership Training programs that focus on Junior and Executive Level Leaders. The training is specifically tailored and ranges from half-day to four full-day sessions. The programs emphasize that participants are responsible for their development in transforming into an effective and moral leader – while recognizing the organizations' responsibility to create an environment within which this development can take place.

Strategic Planning Process

ISCI offers an improved strategic

planning process, Balanced Scorecard, which aids an organization in visualizing and communicating its long-term strategic intent to employees. The Balanced Scorecard is an easy to implement strategic framework that helps align the day-to-day work with the long-term objectives. ISCI has staff experts with a Master Professional Certification in Balanced Scorecard who can facilitate, build, and implement the process for your organization.
